PRE-OPENING INSPECTION

The first pool inspection should be scheduled so that the Certified Pool Operator (CPO) is present on site. The CPO must be prepared to discuss the following to the satisfaction of the inspector:

- 1) If the CPO will not be the on-site person responsible for day-to-day operations including daily testing, then the CPO must:
 - A) Identify those persons (i.e., maintenance personnel, lifeguards, etc.) who will be responsible for those day-to day operations; and,
 - B) Provide documentation for the inspector that he/she has provided adequate training to those identified personnel in the following areas:
 - An explanation of the filtration and recirculation system.
 - Pool water disinfection and control agents.
 - Pool water chemistry and testing.
 - Record keeping as required by 105 CMR 435.21 (5).
 - Water quality chemicals.
 - Proper health and safety precautions when handling pool chemicals and equipment.
 - Cross connection control.
 - First aid and safety equipment.
- 2) The type of procedure in place to secure the pool from entry during non-operational hours or, whenever the pool is voluntarily closed if chemical, physical or safety standards are not being met.
